Natural Ledge Panel

The Ledgestone Panel works well in both interior and exterior applications bringing affordability back to the installation of ledgestone walls. A rough cut natural stone face finish lends this Worldstone Panels use to more rustic natural looking applications.

Worldstone Panels revolutionize the installation of natural stone veneer. Hand selected split stones are adhered together to form standardized panels. This allows for streamlined installation of dry stacked stone veneer. These modular panels make the installation faster and more efficient than the traditional method of cutting and placing individual pieces of stone, reducing cost and labor time. The Worldstone Systems panels are a natural stone alternative to composite/faux stone products. You no longer need to settle for an imitation product when you can use natural stone from Worldstone Systems.

LEDGESTONE SPECIFICATIONS

1.0 sq. ft. per panel (6" x 24")
Approx. panel weight 15 lbs.
Avg. thickness 1/2" to 2"
15 to 17 pieces of stone per panel
4 panels per box (4 sq. ft.)
30 boxes per crate (120 sq. ft.)

PRODUCT ATTRIBUTES

- I Reduced installation time saving time and money over conventional stone installations
- I More colorful appearance than composite/faux stone
- I When properly installed, joints and seams are virtually unnoticeable.
- I Less cutting minimizes dust, noise, waste, and disposal time
- I Worldstone Panels because they are natural stone will not be altered and damaged if they are chipped, cleaned, or brushed compared to composite/faux stone.

INSTALLATION

Please refer to our installation guidelines and local building codes for complete installation methods and recommendations. Installation requires a mortar bed and metal lath for best results. Stone color and shade variations are inherent in natural stone products.

CORNER PIECES

Each corner piece has natural, weathered ends so two pieces fit together neatly. Corners are shipped as a set of two pieces measuring 6" x 8" and 6" x 16".
