

# baoding wold stone SYSTEMS

Contemporary Panels are a stunning alternative to other materials commonly used for interior kitchen back splashes quests leaving them with a lasting impression of your home or location. The Designer Panel works well in both interior and exterior applications and compliments our entire line of natural stone products.

Baoding Worldstone Panels revolutionize the installation of natural stone veneer. Hand selected split stones are adhered together to form standardized panels. This allows for streamlined installation of dry stacked stone veneer. These modular panels are ideal for outdoor living areas such as kitchens, fi replaces, and pools. The Baoding Worldstone Systems panels are a natural stone alternative to composite/faux stone products.

WATER FEATURES      WALLS      FIREPLACES      ENTRIES      FOYERS
