

baoding world stone SYSTEMS

The Accent stone panel was developed by incorporating larger pieces of natural stone into the traditional Baoding Worldstone panel. The panel appearance is i t for all sizes of surfaces and projects. Accent stones larger pieces enhance its appearance when viewed at a distance.

Baoding Worldstone Panels revolutionize the installation of natural stone veneer. Hand selected split stones are adhered together to form standardized panels. This allows for streamlined installation of dry stacked stone veneer. These modular panels make the installation faster and more efi cient than the traditional method of cutting and placing individual pieces of stone, reducing cost and labor time. The Worldstone Systems panels are a natural stone alternative to composite/faux stone products.
