

BBT485D half-duplex Converter

一. Description

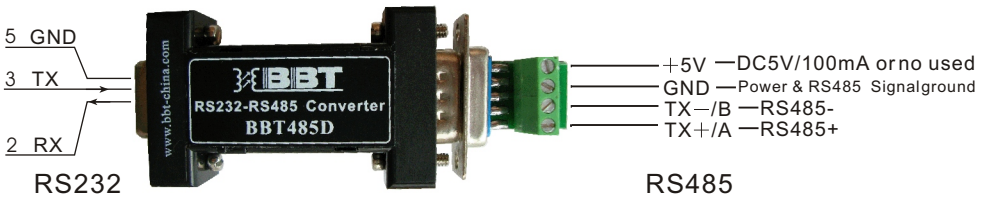

The BBT485D converts unbalanced, full-duplex RS-232 signals to balanced half-duplex (2-wire), RS485 signals and surge protection.

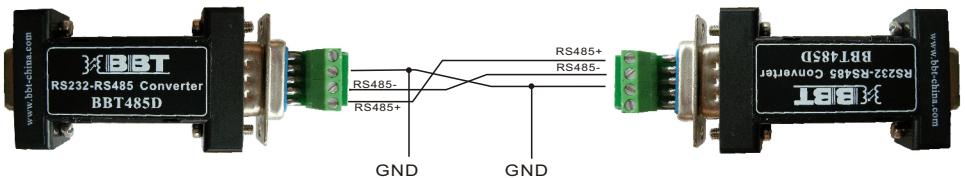

二. Specifications

- ★Transmission Mode: Half duplex asynchronous
- ★DATA Rate : Up to 115.2K baud
- ★Connectors : RS232, DB9 Female; RS485, Terminal Blocks
- ★Power : no used

三. Pin Assignment

四. Application

Half-duplex
