

ASSESSMENT REPORT PROPOSAL IN COMPLIANCE WITH REACH

NO. RT-SVHC-010-1000945-1

DATE: Jul. 9, 2010

We have been commissioned by the client to conduct REACH compliance assessment on their products (Contract No.: RT-SVHC-010-1000945-1). We have assessed the client's product under the European Regulation (EC) No 1907/2006 (hereinafter referred as REACH Regulation), including product categories, substances list, SVHC (Substances of Very High Concern) as well as the client's responsibilities and obligations for this product under REACH Regulation. The result and findings of the assessment and our proposals are described as follows:

1. Client's Information

Name:	Will Young Textiles Ltd., Huzhou
Address:	No. 920-925, Jinshiji Building, Fenghuang Road, Huzhou, Zhejiang, P. R. China
Name of the contact person:	Min Wu
Tel:	+86-572-2055205
Fax:	+86-572-2053009

2. Product Identification

Product name:	TECNIC-PolyESTER OXFORD FABRIC
Type/ model:	N/A
Physical appearance/colour:	Fabric/black
Product type:	Article

3. Product Substances Information

3.1 Substance on its own or in mixtures

Index	Substance name	CAS No.	EC No.	Tone
N/A	N/A	N/A	N/A	N/A

3.2 Substance in article intended to be released

Index	Substance name	CAS No.	EC No.	Tone
N/A	N/A	N/A	N/A	N/A

3.3 SVHC (Substance of Very High Concern) in article (Details see Annex 1)

4. Responsibilities and Obligations

4.1 Registration

4.1.1 According to the definition in Article 3(3), Chapter 2, Title I, the client's product, TECNIC-PolyESTER OXFORD FABRIC is regarded as "Article" under REACH Regulation.

4.1.2 According to Article 7(1), Chapter 2, Title 2 of REACH Regulation, there is no substance intended to be

released under normal or reasonably foreseeable conditions of use in the client's product. Therefore, registration is not required.

4.2 Notification

As the concentrations of the SVHCs defined in Article 57 of REACH Regulation in the client's products are less than 0.1% weight by weight (w/w), the obligation of notification is not required according to Article 7(2) under REACH Regulation.

Note: Dissenting views, questioning the application of the 0.1 % threshold to the entire article have been notified by 6 Member States (Austria, Belgium, Denmark, France, Germany and Sweden) and this calculation method was not endorsed by these Member States.

In this report, we adopt the opinions from these Member States that the 0.1% threshold should relate to individual articles, parts or materials that a complex article consists of.

4.3 Information Communication down the Supply Chain

As the concentrations of the SVHCs in the client's product are less than 0.1% weight by weight (w/w), the obligation of communicating information down the supply chain is not required in accordance with Article 33 of REACH Regulation.

4.4 Others

4.4.1 Authorisation

Since the manufacture of this product is based outside the EU, and the lifecycle of related substances outside EU is irrelevant with respect to REACH Regulation, there is no obligation of authorisation required for the client's product.

4.4.2 Restriction

The directive on marketing and use of dangerous substances 76/769/EEC have been repealed since 1 June 2009, and the client should follow the restriction conditions outlined in Annex XVII in REACH Regulation from then on.

As we haven't received any testing request of Restricted Substance from our client, the detail of restricted substance in the product is unknown.

5. Assessment Conclusions

According to the product information provided by the client and related Articles of REACH Regulation, we draw the conclusion that:

The products supplied by the client comply with REACH Regulation about SVHC as it currently stands.

6. Proposal for REACH Compliance

6.1 The client should inform his downstream users as soon as possible that the products mentioned above comply with REACH.

6.2 The client should pay constant attention to the SVHCs in the candidate list and fulfil related obligations if necessary. This list may be updated regularly and it is important to monitor any changes to it.

6.3 The client should pay special attention to the restricted substance in the annex XVII.

6.4 The client should ensure the exported products are consistent with the sample provided to Chemical Inspection & Regulation Service Limited in material, vendors and production process.

If you want to verify the authenticity of the report, please login the report verification system according to the operating instruction: www.cirstek.com/dvs/. If you have any question about the report, please contact us.

STATEMENT

First: Instruction for the assessment conclusion

The above assessment conclusions that we have made is based on the understanding and analysis of the consignor's product and REACH regulation and only applies to the situation described in the report. This conclusion does not apply to any enterprise or product that fails to meet the description.

As parts of REACH regulation (for example Annex XIV) are still under modification, the above conclusion only applies to REACH regulation as it currently stands.

This report is only used to assist the consignor to know his own responsibility and obligation under REACH Regulation, and provide the actors in his supply chain with evidence that his products are in compliance with REACH regulation.

The consignor should study this report carefully. If there is any doubt or suggestion, please contact us and we will do our best to clarify and include any necessary amendments.

Second: Disclaimer Statement

We undertake no responsibility and no obligation to verify the authenticity of information supplied by the consignor.

The client should ensure the exported products are consistent with the sample provided to our company in material, vendors and production process. We can't be held responsible or bear any consequence which may result from differences between the sample products provided to us and the exported products.

We have completed this report with all professional competence, responsibility and reasonable due diligence, however due to the limited approach to the consignor, the products and the market we can't guarantee that the content of the report is fully accurate.

Consignor should make a cautious decision to adopt the assessment conclusion of this report. We assume no liability for any loss incurred as a result of the use of the conclusion.

Third: Privacy statement and others

This report has been completed by us independently. We guarantee that we shall not disclose information in the above report to any third party (except with the express written permission of consignor). We shall assume no responsibility for any loss caused by disclosure of the report.

We suggest that before offering the report the consignor should sign a security agreement with the third party in order to keep the information of consignor and products in the report from disclosure.

Chemical Inspection & Regulation Service Limited

ANNEX 1 TEST RESULTS OF SVHC (SUBSTANCE OF VERY HIGH CONCERNED)

Sample Description:

Name:	TECNIC-PolyESTER OXFORD FABRIC
Quantity:	1
Description:	Black fabric
Date of receiving sample:	Jul. 5, 2010
Date of test:	Jul. 5, 2010 – Jul. 9, 2010
Test requested:	Thirty eight (38) Substances of Very High Concern (SVHC) analysis. SVHC list is based on the publication by European Chemical Agency (ECHA) on 28 October 2008, 13 January 2010, 30 March 2010 and 18 June 2010, regarding regulation (EC) No 1907/2006 concerning the REACH.

1. List of SVHC

NO.	Name	CAS No.	EC No.	REACH Limits (mg/kg)	Classification
1	Anthracene	120-12-7	204-371-1	1000	PBT
2	4,4'- Diaminodiphenylmethane	101-77-9	202-974-4	1000	CMR2
3	5-tert-butyl-2,4,6-trinitro-m-xylene (musk xylene)	81-15-2	201-329-4	1000	vPvB
4	Hexabromocyclododecane	25637-99-4 3194-55-6 (134237-51-7, 134237-50-6, 134237-52-8)	247-148-4	1000	PBT
5	Alkanes, C10-13, chloro (Short Chain Chlorinated Paraffins)	85535-84-8	287-476-5	1000	PBT
6	Dibutyl phthalate(DBP)	84-74-2	201-557-4	1000	CMR2

Remarks:

1. Test parts may be single material or a variety of materials which could not be divided by physical ways. Unless otherwise noted, components of base material, coating metal, coating paint and/or colouring pigment were no longer divided, but tested as one whole.
2. All results are applicable only to the test samples.
3. N.D. = Not detected (<MDL) MDL= Method Detection Limits
4. Because it is difficult to detect the substances CoCl_2 , $\text{C}_{24}\text{H}_{54}\text{OSn}_2$, $\text{Na}_2\text{Cr}_2\text{O}_7$, PbAsHO_4 , As_2O_3 , As_2O_5 , PbCrO_4 , Lead chromate molybdate sulphate red (C.I. Pigment Red 104), Lead sulfochromate yellow (C.I. Pigment Yellow 34), Triethyl arsenate, H_3BO_3 , $\text{Na}_2\text{B}_4\text{O}_7$, $\text{Na}_2\text{B}_4\text{O}_7 \cdot 7\text{H}_2\text{O}$, Na_2CrO_4 , K_2CrO_4 , $(\text{NH}_4)_2\text{Cr}_2\text{O}_7$ and $\text{K}_2\text{Cr}_2\text{O}_7$ via direct tests, we detect the substances via converting them into detectable elements by considering that all the relative elements exist in the form of their compounds when having the test.
5. Chemical Inspection & Regulation Service Limited reserves the right of final explanations.
