

N-95 Particulate Respirator

With Magic Arch® and Positive Facial Lock®

The Alpha Pro Tech N-95 Particulate Respirator, designed specifically for use in a healthcare setting, is NIOSH-approved as a Type N95 respirator and meets CDC guidelines for TB exposure control.

One-Size-Fits-All

To help you reduce costs and inventory, the N-95 Respirator uses our exclusive Magic Arch/Positive Facial Lock "one-size-fits-all" design. This unique design feature permits the respirator to be "custom fit" to virtually any face, no matter what shape or size. This allows you to stock only one size for all your TB protocol needs.

The traditional pleated style N-95 offers all this without the drawbacks of cone and duckbill-style respirators which restrict downward vision and collapse easily when stored.

- **Integral Magic Arch®** — Provides a larger breathing chamber with no restriction of downward vision as duckbill or cone masks do.
- **Positive Facial Lock® (PFL)** — Allows total facial closure for "custom fit" on any size face when donned correctly.
- **Totally Latex Free** — Comfortable, knit tricot mesh covered bands contain no natural rubber latex, eliminating latex allergy concerns.
- **Traditional Pleated Design** — Saves inventory space, cannot be crushed when stored, as duckbill and cone respirators can, and is easy to carry with you.

Donning Instructions:

1. Grasp nosepiece at top of mask with one hand. Slide finger of other hand behind chinpiece.

2. Open mask by pulling down and out on chinpiece until mask is fully open. It is **IMPORTANT** that mask is fully open.

3. Place chin in pocket created. Stretch bands over back of head, positioning bottom band behind neck below ears and top band near crown of head.

4. Conform nosepiece to nose and face contours making sure Magic Arch® is fully extended away from nose and mouth.

5. Holding mask at nosepiece, place one finger inside the mask on the malleable aluminum chinpiece, pull down gently so that mask is snug against face.

6. Pinch any excess material together under chin and fold over or twist.

7. Face Fit Check: To check fit, place both hands along the edges of the respirator and exhale. If air escapes around your nose, adjust the nosepiece. If air leaks at the respirator edges, unfold or untwist the chinpiece, repeat Steps 5 and 6.

8. N95 Respirator correctly fit to face.

Respiratory Protection Standards

Use of respirators in the workplace is regulated by OSHA Respiratory Protection Standard (29 CFR 1910.134). This requires an appropriate respirator program be established, which includes a written program, employee training, respirator fit testing and medical monitoring, along with program documentation and maintenance. For more information, please see OSHA's website at www.osha.gov, or for a 695INFO Kit, call Alpha Pro Tech at 1-800-749-1363.

WARNING

1. This product does not eliminate the risk of contracting any disease or infection. Change immediately if the respirator comes in contact with blood or fluids, including body fluids. OSHA has not set a permissible exposure level for airborne biohazards.

2. Follow all instructions and warnings on the use of this respirator. Failure to do so will reduce respirator effectiveness, wearer protection and may result in sickness or death. Wear during all times of exposure. For additional information refer to your supervisor and/or see dispenser box.

3. Before use, the wearer must be trained by the employer in proper respirator use in accordance with applicable safety and health standards for the contaminant and exposure level in the assigned work area.

4. See fitting instructions elsewhere in this literature.
