### Physical Property Testing Results of Black (Blue) Limestone

Type of test	Units	Actual Values		
		Max	Min	Average
Bulk Density	g/cm <sup>3</sup>	2.65	2.64	2.65
Water Absorption	%	0.29	0.27	0.28
Dry Compressive Strength	MPa	225.3	196.5	208.0
Dry Flexural Strength	MPa	14.2	12.2	13.5
Wet Flexural Strength	MPa	11.3	11.0	11.2
Shore hardness	HSD	61	54	58

---

### Paver

Blue limestone is largely used in out door paving, such as paving for square plaza, courtyard, footway etc.

As shown in the picture, the surface finishing for the pavers around is honed with round nose which appears elegance and sublimity. For the center pavers, they are tumbled finishing from which you will feel the ancient and experience the history.

Length and width: 5cm to 60cm, Thickness: 2cm to 5cm. Customized sizes are also available.

---

### Quoin

Quoin is used at the corner of the wall building, left and right sides of the quoin will be visible in finished project.

The most popular color is blue, the surface of which is roughing or grit. Other finishing such as honed (light dark) and bush hammered (grey) are also welcomed.

Size: 660\*330\*280mm

Customized sizes are also available

---

### Curbstone

Curbstone is widely applied in road edges. When you are on the way to work or take a journey outside, curbstone will always be within your field view.

Size: 80\*20\*20cm

Customized sizes are also available
