

MS 美军标连接器

The MS Connector of American Army

产品介绍:

该系列产品完全符合美国军用标准 MILC5015 的技术要求，壳体为铝合金材料，壳体表面为军绿色镀锌钝化处理，绝缘体为 PPS 塑料或氯丁橡胶，接触体为铜合金，表面镀银处理。采用螺纹、卡口等连接方式，接触体采用焊接或压接式结构。产品具有重量轻，品质好，性能可靠，规格齐全等特点，完全可满足国内外用户对该系列标准产品的使用要求。该系列产品特广泛应用于航空、航天、船舶、电子、通讯、铁路、机床等军民产品的电气线路的电连接。

This series connector is completely fit to technical requirement of the standard of American Military MIL—C—5015 . The body is with aluminum alloy material, the surface of body is with green galvanization deactivation processing, the insulator is the PPS plastic or the chloroprene rubber, the contacts are with copper alloy and the surface is with silver-plating processing. It' s with thread or bayonet connection. The connects are with welding or compressing in structure. The connector is light in weight, good quality and high dependability, completely fit to customers' requirement all over the world. It' s widely used in electronic connection of aviation, spaceflight, shipbuilding , electronic , communication , railway, machine tool and relative electronic
