

水下连接器

THE STAINLESS STEEL DEEP WATER CONNECTOR

产品介绍：

该系列连接器连接方式为螺纹或卡口连接，使用方便，可快速插拔，壳体为高强度不锈钢（316）、具有抗强腐蚀（酸、碱）、宽温度环境和高压特点，并在海洋设备和石油和铁路领域得到广泛的应用。该产品采用的国家军用和铁路标准为 GJB598 标准。

This series connector is with thread or bayonet connection which is easy for use, and insert quickly. The body, which is with high-strength stainless steel (316), is with a strong anti-corrosion (acid, alkali), wide temperature and high-pressure characteristics of the environment. This connector is widely used for the connection of electrical equipment of rail train. The plug or the receptacle may be mounted with both pins and sockets.
