

**Mini-Dumper--- LZMT-370**

Engine: Honda GXV 160 5.5HP. Four-stroke Air-cooled

Transmission: Peerless transaxle 5 forward speeds, 1 reverse speed

Travel Speed: 0-6KM/H

Braking Kit: Disk

Traction: 2WD and 4WD

Cable: protected

Wheels: Front 400\*10, 4ply, Rear 400\*8

Dry Weight: 171Kgs

Load Vol./Weight: 210Liters/370kgs

Noise Level: lower than 80DB

Narrow Width: 715mm

Fuel Type: 91# above unleaded gasoline

Grade ability: 25 degree

Dimension(L\*W\*H): 1990\*715\*1070mm

*It is a good gardening and horticulture tool for builders, contractors and landscapers. Wonderful powered wheel barrow, motorised garden wheel barrow, mini dumper, motorized concrete buggy articulated.*

**Main Feature:**

- (1) One of the biggest features is the strength of the chassis, which has been designed via testing for long time service in construction using especially for renting business. This chassis is made of 2.5mm thickness steel with reinforced plates in the key areas.
- (2) This item is available for various working conditions, for we have made special protections for all the key parts which are our standard kits for this item. The protections include a transmission support plate to protect the aluminium housing in the transmission system. A belly plate is put on the bottom to keep the parts from dirt with screws installation.
- (3) Changing a wheel can be finished within 3 minutes by moving the friction wheel levers into the service position, no need to deflate the other tires during changes.
- (4) There should have different type tire options for different working sites but the wheel size the same.
- (5) The same size wheels and the same size tires for the wheel. Only one type of spare tire for replacement.

- (6) *Equipped with disk brakes and parking disc brake for security.*
- (7) *This item also includes a lifting eye which is between the skip and handle at the point of gravity(COG) of the machine.The dumper has strapping points for moving onto the back of the vehicles.*
- (8) *The fuel tank has a capacity of 2.5 liters and is situated under the engine cowl and can be filled with ease from the top console of the machine.*
- (9) *This item has two fuel filters.one is in the fuel tank and the other is an in-line filter ensuring no dirt flow into the carburetor.*
- (10) *Well-balanced with full loads.at the end of the gearbox we have added extra bearings.*
- (11) *Quick change over to flatbed mode for hauling pavers,sod and ect.*
- (12) *Effective in small work and more flexible.Available in two and four wheel drive mode.Operation friendly and effectively.*
- (13) *A friction system transfers power from the permanently driven front wheels to the rear when required via an intermediate idle wheel,which reduces the fuel consumption and permits quick wheel changes.*
- (14) *The mini dumper is strongly built with reinforced bucket for the durability and shields to protect the engine,axle and gearbox.*
- (15) *Most metal surfaces are nylon coated for the durable using finishing.*
