ADS and Cardiac Science: Partnering to save the lives of those who serve & protect

ADS is the authority in sourcing thousands of products for the military. Cardiac Science is a global leader in advanced cardiac products. Together, ADS and Cardiac Science are partners with the expertise to provide military purchasers with convenient options for defibrillation products at competitive prices.

Why seconds count

According to the American Heart Association (AHA), a sudden cardiac arrest (SCA) victim requires defibrillation to stop ventricular fibrillation (VF), an often-fatal heart abnormality. The sooner the defibrillation, the better the victim's chances of survival. (Defibrillation within three minutes of SCA raises the chance of survival — by as much as 70 percent.) That's why having an AED to use before emergency medical responders arrive is critical.

Together we bring you:

Centralized purchasing power

ADS is The Source for the military. We consistently deliver thousands of products, where and when needed, at a competitive price.

Convenient purchasing options

ADS offers a variety of contracts and purchase options for military customers.

Creative logistics solutions

ADS provides logistics solutions, including custom warehousing and kitting.

Outstanding products

Automated external defibrillators (AEDs) from Cardiac Science are known for their durability, safety features, and ease-of-use.

Why Powerheart® is the AED of choice

With more than 20,000 AED programs deployed globally, Cardiac Science AEDs are trusted and ready to save a life for customers in military, government, emergency services, manufacturing, technology, transportation, and other public places.

They'll tell you they chose Powerheart because of its:

- + **Reliability.** Cardiac Science's patented Rescue Ready® technology self-tests the battery, defibrillation pads, and internal electronics daily to ensure they're ready to perform whenever you need them.
- + **Ease of use.** Clear voice prompts and helpful text screen guide the user through the entire rescue operation.
- + **Power.** All Powerheart AEDs are powered by a single medical-quality Intellisense lithium battery — not by a handful of consumer-quality batteries.
- + **Portability.** Rugged hard-shell carry cases, soft-sided carry bags, and rescue backpacks make it easy to transport a Powerheart for training activities and field operations.
- + **Assurance.** Cardiac Science stands behind its Powerheart AEDs with a 7-year warranty, among the longest in the industry.

Rescue backpack

Perfect for field operations, and search and rescue teams, this backpack securely carries an AED, first-aid kit, and other emergency response items in an external pouch for quick access.

Dependable, expert support

Cardiac Science AEDs currently protect the men and women in the:

- + Army National Guard
- + Air National Guard
- + U.S. Navy
- + U.S. Coast Guard
- + Anniston Army Depot
- + 81st RRC
- + U.S. Marine Corps
- + U.S. Border Patrol
- + U.S. Air Force
- + Department of Homeland Security
- + USACE
