

# LED UFO Grow Light

## Powerful LED Grow Light to Replace Standard 400W to 600W HPS Grow Light

### QUOTATION SHEET

#### Features:

- \* Powerful 90w led grow light to replace standard 400W to 600W HPS grow light
- \* Lifetime over 50,000 hours
- \* Use only the exact spectrums required for plant photosynthesis
- \* Built-in thermo-sensitive devices cut off power supply when over-heating happens, either due to high ambient temperature or ventilation fans problem
- \* The low heat emission eliminates the need for ducting & heat exhaust fans
- \* Ideal for all phases of plant growth, and works well with any indoor garden, whether hydroponics or soil based
- \* No setup required - this is a plug-n-play grow light
- \* Each light covers 7 square meters(from 1 meter distance)
- \* OEM/ODM or customized integrated grow lighting solutions are available as well. Please contact us with your requirements.

**635nm Standard RED LED, 460nm BLUE LED**  
**(Same as what's generally available on the market, but with better pricing)**
