The Digital Combo is a multipurpose swing-away heat press. This fully digital swing-away press boasts all of the digital features of the state-of-the-art control system. This includes Digital Temperature, Time, and a Digital Pressure/ Height gauge, as well as programmable presets, user definable alarms and a host of other digital features. The construction is a solid steel welded framework, However, the popular success of the Digital Combo lies in its instantly interchangeable system of heat platens and tables. The Digital Combo utilizes quick-change attachments for heat transferring images onto a surprisingly wide variety of materials.

This one press has every attachment necessary to professionally imprint: T-shirts, Ceramic Plates, Ceramic Tiles, Mugs, Mouse Pads, metal plates, Jigsaw Puzzles. Fabrics & Materials, etc.

The interchangeability of the Digital Combo is performed quickly and safely. If your product offering is going to reach beyond just flat & fabric items, the Digital Combo is the superior heat press machinery solution.

The mug attachment for the Digital Combo allows the imprinting of mugs 1 side at a time. With dye sublimation transfers, full wrap images can be perfectly applied in multiple pressings.

The plate die platens feature quickly inter-changeable components for allowing the circular heating element to press inside ceramic plates. Also included is a template tray and pad for centering the plate.

Due to its swing-away design and wide adjustment range, The Digital Combo excels at handling extremely thick items such as plaques, tile, woods, plastics, and other imprintable items that can not be pressed in conventional T-Shirt presses.
