### Introduction

ZTE MF80 is a 3G/2G mobile hotspot device, working in GSM/GPRS/EDGE/WCDMA/HSPA/HSPA+ network. The client devices could connect to it via USB or Wi-Fi interface. The device supports data and SMS services, enabling you to communicate anytime and anywhere. This quick guide provides instructions on how to install and get started with the product. For information about connection of services, please consult your service provider.

### Specification

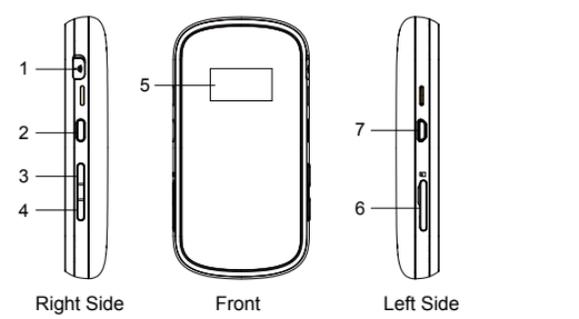

Data Service	HSPA+: DL 42Mbps HSUPA: UL 5.76Mbps WCDMA CS: 64kbps UL/DL WCDMA PS: 384kbps UL/DL
Interface	USB and Wi-Fi
Wi-Fi Standard	802.11b/g
Wi-Fi Security	WEP/WPA/WPA2
USB Version	USB 2.0 HIGH SPEED
USB Interface Type	Micro USB
Weight	97g
Dimensions (W×H×D):	102mm×53mm×16.6mm
microSD card	Support up to 32GB microSD card
Power Adapter	5V/1.5A
Battery	1900mAh
*Standby time	100hours
*Working time	4.5hours

Operate system	Windows 7, Windows Vista(32bit or 64bit), Windows XP (SP2 or later), MAC (10.4 or later)
Web Browser	IE (7.0 or later), Firefox (2.0 or later), Opera (10.0 or later), Safari (4.0 or later), Chrome (5.0 or later)
Operating temperature	0°C ~ +40°C
Storage temperature	-20°C ~ +50°C
Charging temperature	0°C ~ +45°C
Humidity	5%~ 95%

Notes: microSD is a trademark of SD Card Association.  
The device's standby and working time are only for your reference, and based on ideal working environment.

### Getting to Know Your Device

The following figure shows the appearance of the device, it is only for your reference. The actual device may be different.

### Interface and Buttons

1. External Antenna Connector	It is used to connect an external antenna to enhance the signal strength.
2. Power	Hold the <b>Power</b> button to switch on/off the device.
3. Connect	<ul style="list-style-type: none"> <li>Press it to connect to the Internet or disconnect from the Internet.</li> <li>Hold it for more than 3 seconds to switch the WAN Connection Mode between A(Always on) or M(Manual).</li> </ul>
4. WPS	<p>This button is used to start/end Wi-Fi Protected Setup authentication process and enable/disable the Wi-Fi function.</p> <ul style="list-style-type: none"> <li>Hold it for more than 3 seconds to activate the WPS function.</li> <li>Press it to enable/disable Wi-Fi function.</li> </ul>
5. LED Screen	It indicates the signal type, signal strength, battery, Wi-Fi, etc.
6. Memory card slot (microSD card)	It is where you insert the memory card (microSD card).
7. Charger/USB port	<ul style="list-style-type: none"> <li>Charge your device.</li> <li>Connect the client to your device via USB cable.</li> </ul>

Notes:  
Hold the **WPS** and **Power** buttons simultaneously until the LED screen turns off, and then release the buttons. The device will restart automatically and restore to the factory default settings.

### LED Indicator

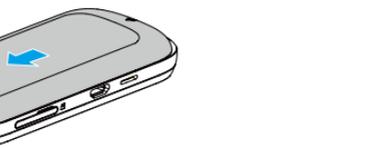

When the device is powered on, the following icons will appear on the LED screen, with the corresponding indicates listed in the table below:

Icon	Indication
	Network signal strength.
	Network type. 2G or 3G icon will appear on the LED screen according to the network being connected.
	Connect to the Internet automatically.
	Connect to the Internet manually.
	Roaming network indication.
	New message received.
	Wi-Fi Status and number of the connecting users.
	Battery power indication.

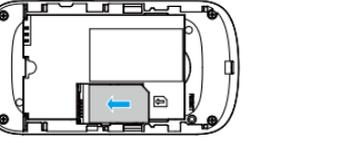

### Hardware Installation

#### Inserting SIM Card and Battery

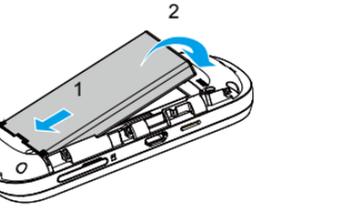

- Slide the battery cover, and remove it.

- Insert the SIM card into the SIM card holder.

- Insert the battery as shown with the contacts located against the metal springs, and press the battery down into the case.

- Put the battery cover of the modem flatly upon the body of device. Direct the battery cover towards the locking catches on the sides of the device, and then push the battery cover to lock the cover into its place.

#### Inserting microSD Card

- Pull the microSD cover out of the card slot.

Notes:  
Do not pull the cover rudely, as it is connected with the device.

- Insert the microSD card into the microSD slot. The following picture shows the correct inserting direction. You will hear a click when the microSD card locks in place.

- Close the microSD cover.

#### Switching On/Off Your Device

Hold the **Power** button to switch on/off the device.  
Notes:  
The device is powered on when the LED screen lights up.

#### Charging Your Device

You can charge your device by using USB cable or adapter.

- Insert the charger lead carefully with the plug arrow facing the bottom of the device.
- The plug only fits one way. Do not use excessive force to insert the plug.
- Make sure the plug is the right way round and lined up correctly and insert it gently.

#### Working Mode

Your device supports three working modes. For the client, we only use PC or laptop as the example in this document.

#### USB Mode: Connect to the device with the USB cable.

#### Wi-Fi Mode: Connect to the device via Wi-Fi.

#### Mixed Mode: Connect to the device with the above two connection methods.

Notes:  
If you want to connect to the Internet by using Wi-Fi mode, make sure that the client supports the Wi-Fi function.  
The following picture is the application example. All of the client devices can surf on the Internet at the same time.

### Establish a connection between your device and the client

#### Via USB Cable

- Connect your device and the client with the USB cable.
- Power on your device.
- Follow the system prompts to complete the software installation.

#### Notes:

- If the system does not launch installation automatically, you can run the installation program in path of **My Computer > Mobile Hotspot**.
  - The driver of your device will be installed at the same time.
- After the installation, the system will create a shortcut icon on your desktop and a program group in the **Start→Programs** menu. The connection between your device and the client will be established successfully a moment later.

#### Via Wi-Fi

- Power on your device directly. It will take 1~2 minutes to initialize.
- Use your normal Wi-Fi application on the client to search the available wireless network.

#### Notes:

- You need to check your **Wireless Network Connection**. Set the client to obtain an IP address automatically in the Internet protocol (TCP/IP) properties, and the client will get an IP address like "192.168.0.100".
- Select the SSID of your device, and then click **Connect**.

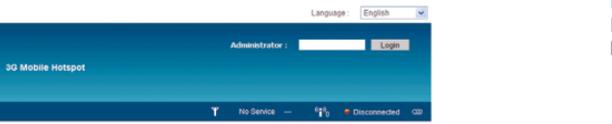

## Access the WebGUI Configuration Page

1. Make sure the connection between your device and the client is correct.
2. Launch the internet browser and enter <http://192.168.0.1> or <http://uFi.home> in the address bar.

**Notes:**  
It is recommended that you use IE (7.0 or later), Firefox (2.0 or later), Opera (10.0 or later), Safari (4.0 or later), Chrome (5.0 or later).

3. The login page appears as follows.

WAN Information		WLAN Information	
• Network Provider	---	• SSID	uFi_BSEF00
• Network Type	No Service	• Channel	Auto
• Connection Status	Disconnected	• Security Level	WPA-PSK
• IP Address	0.0.0.0	• Gateway Address	192.168.0.1
• Primary DNS		• Subnet Mask	255.255.255.0
• Secondary DNS		• DHCP Server	Enable
Device Information			
• Software Version	WEB_T23M8011.0.0B05		
• Firmware Version	BD_CUMF8011.0.0B04		
• PIN Status	Disable		

View the information of WAN, WLAN and Device. Input the case-sensitive default password "admin", and then click **Login** to access the WebGUI Configuration page.

**Notes:**

- Do not put anything on the top of your device. Do not lay devices to overlap each other when using.
- The device takes 1~2 minutes to initialize, and attach to the network.

## PIN Code Verification

If the PIN code of your SIM card is enabled, you will need to input the PIN code when you login at the first time.

**Notes:** The SIM card will be locked if you enter wrong PIN code consecutively for three times.

If you want to modify the PIN Status, please select **Settings > Advanced > PIN Management** to do the actions.

Status	Management	Restore	PIN Management	Router								
			<table border="1"> <tr> <td>PIN Status</td> <td>Disable</td> </tr> <tr> <td>Action</td> <td>Enable</td> </tr> <tr> <td>PIN</td> <td></td> </tr> <tr> <td></td> <td>Remaining times: 3</td> </tr> </table>	PIN Status	Disable	Action	Enable	PIN			Remaining times: 3	
PIN Status	Disable											
Action	Enable											
PIN												
	Remaining times: 3											

## Quick Settings

After logging in, select **Quick Settings**, and then the wizard appears.

**Notes:**  
Basic parameters can be set in this wizard. For advanced parameters, you need to set them in other menus.

The wizard guides you how to set the basic parameters for your device in the safest way. After this procedure, you can use your Internet service.

**Notes:**  
The parameter settings may have been preset by your service provider, and you will enjoy your Internet service directly. Please contact your service provider for details if you want to do some modification.

## WAN Connection

After logging in, select **WAN Connection**, and you can choose the WAN Connection Mode according to your requirement.

WAN Connection Mode	Always On
	Manual
	Connect Internet
WAN Connection Status	Disconnected

WAN Connection Mode	Always On
	Manual
	Disconnect Internet
WAN Connection Status	Disconnected

PIN Management	Disable
Action	Enable
PIN	
	Remaining times: 3

After logging in, select **Settings**, and you can do the following operations.

Select <b>Settings &gt; 3G Settings</b>	View the Wireless Information, select Band Selection Mode and change APN Setting..
Select <b>Settings &gt; Wi-Fi Settings</b>	View the current station list, change the basic wireless network settings, choose security mode and WPA type, and perform the WPS configuration.
Select <b>Settings &gt; Firewall</b>	Set the IP/Port Filtering or Port Mapping.
Select <b>Settings &gt; Advanced</b>	View the current status of your device, change the Administrator Settings, restore factory defaults, manage PIN or set the LAN interface configuration.

## PhoneBook

This function allows you to store contacts to your device or SIM card. After logging in, select **PhoneBook**, and you can add a new contact in **Add New** tab, and perform operations to the contact in the **Device** or **SIM Card** tab.

1. Log in the WebGUI Configuration page, and select **WAN Connection**.
2. Select **Manual > Disconnect Internet**.
3. Click **Apply**.

WAN Connection Mode	Always On
	Manual
	Disconnect Internet
WAN Connection Status	Disconnected

WAN Connection Mode	Always On
	Manual
	Disconnect Internet
WAN Connection Status	Disconnected

**Notes:**  
Turning off the device can also terminate the internet connection.

## SMS

This function allows you to view, send and receive short messages. After logging in, select **SMS**, and you can do the following operations.

Select <b>SMS &gt; Device</b>	Operate the SMS in your device.
Select <b>SMS &gt; SIM Card</b>	Operate the SMS in your SIM card.
Select <b>SMS &gt; New Message</b>	Send or save SMS.
Select <b>SMS &gt; SMS Settings</b>	Set the SMS configuration.

## Usage of WPS

If your client device supports WPS, you need not to input the password manually after WPS has been available. Please do the following:

1. Start up your device.
2. Launch the client device connected to your device.
3. Enable the WPS function of your device.
4. Enable the WPS function of the client.

**Notes:**  
If the current security mode of the device is **OPEN** or **SHARE**, the WPS function is useless.  
For the detailed operations about the client, please refer to the client's instruction.

## Sleep Mode

When you enable the Wi-Fi function and use the battery to supply power to the device, once no user connects to the device within 10 minutes, the device will enter the sleep mode, and the LED screen will be turned off. In the sleep mode, the Wi-Fi function will be disabled. Press **Power** or **WPS** button to wake up the device, and the LED screen will be turned on.

## Warning and Notice

### To the Owner

- Some electronic devices are susceptible to electromagnetic interference sent by your device if inadequately shielded, such as the electronic system of vehicles. Please consult the manufacturer of your device before using if necessary.
- Operating of laptop and desktop PCs and your device may interfere with medical devices like hearing aids and pacemakers. Please always keep them more than 20 centimeters away from such medical devices when they are turned on. Turn your device off if necessary. Consult a physician or the manufacturer of the medical device before using your device.
- Be aware of the usage limitation when using your device at places such as oil warehouses or chemical factories, where there are explosive gases or explosive products being processed. Turn off your device if required.
- The use of electronic transmitting devices is forbidden in aircrafts, at petrol stations and in hospitals. Please observe and obey all warning signs and switch off your device in these conditions.
- Do not touch the inner antenna area if not necessary. Otherwise it will affect your device's performance.
- Store your device out of the reach of little children. Your device may cause injury if used as a toy.
- Do not touch the metallic parts of your device so as to avoid a burn, when your device is working.

### Using Battery

- Do not short-circuit the battery, as this can cause excessive heat and fire.
- Do not store battery in hot areas or dispose of it in a fire to avoid explosion.
- Do not disassemble or modify the battery.
- When not using the battery for a long period, remove it from your device and store it in a cool dry place.
- Never use any charger or battery damaged or worn out.
- Return the wear-out battery to the provider or put it in the appointed recycle place. Do not put it in familial rubbish.

**Warning:**  
If the battery is broken, keep away from it. If it taints your skin, wash your skin with abundant fresh water and ask doctor help if necessary.

### Using Your Device

- Please use original accessories or accessories that are authorized. Using any unauthorized accessories may affect your device's performance, and violate related national regulations about telecom terminals.
- Avoid using your device near or inside metallic structures or establishments that can emit electromagnetic waves. Otherwise it may influence signal reception.

## Warning and Notice

### To the Owner

- Your device is not waterproof. Please keep it dry and store in a shady and cool place.
- Do not use your device immediately after a sudden temperature change. In such case, it will produce dew inside and outside your device, so don't use it until it becomes dry.
- Handle your device carefully. Do not drop, bend or strike it. Otherwise your device will be damaged.
- No dismantling by non-professionals and only qualified technicians can undertake repair work.
- Operating temperature range of 0°C ~ +40°C and humidity range of 5% ~ 95% are recommended.
