DC590+ DC Drive Integrator Series 2
Digital DC Drives - 3 to 2000 HP (15A – 2400A)

**Product Overview**

The DC590+ Integrator Series 2 sees the next step in the development of DC drive technology, derived from over 30 years experience in designing DC drives. With its innovative 32-bit control architecture, the DC590+ has the flexibility and functionality to more than meet the requirements of all applications, from basic motor installations through to the most demanding multi-motor systems.

The DC590+ is also available as a “ready to install” drive package called the DRV. This is a single integrated module that includes all the associated power components within the package. This innovative approach radically reduces design time, panel space, wiring time and cost. The DRV concept is unique and comes from the experience gained from thousands of successful applications across a diverse range of industries.

**Product Overview Chart**

The DC590+ is easily integrated into new or existing systems, offering improved levels of performance and productivity.

As part of the full DC drives product range, the DC590+ further confirms Parker SSD Drives’ position as the market leader in DC drive technology.

**Advanced Control Architecture**

Benefiting from the improved performance of a 32-bit RISC processor, the **DC590+ Integrator Series 2** delivers enhanced functionality and increased flexibility, making it suitable for use in a wider range of more complex applications.

- Faster drive response
- Greater control capabilities
- Increased math and logic function blocks
- Enhanced diagnostic and programming functionality
- Common programming tools with other SSD Drives models
**Next Generation Technology**

Building upon the highly successful DC590+ drive used in thousands of applications world-wide, the DC590+ Integrator Series 2 drive takes DC motor control to the next level. With its state-of-the-art advanced 32-bit control architecture, the DC590+ drive delivers highly functional and flexible control suited to a whole host of industrial applications.

Providing control for some of the most demanding motor control applications, Parker’s DC experience and technologies are some of the most advanced in the industrial marketplace. With drives from 1 Amp through to 2700 Amps, Parker can provide the optimum solution to suit any application.

**Typical Applications**
- Converting machinery
- Plastics and rubber processing machinery
- Wire and cable
- Material handling
- Automotive

**Function Block Programming**

Function Block Programming is a tremendously flexible control structure that allows an almost infinite combination of user functions to be realized with ease. Each control function (an input, output, process PID for example) is represented as a software block that can be freely interconnected to all other blocks to provide any desired action.

The drive is shipped with the function blocks pre-configured as a standard DC drive so you can operate it straight from the box without further adjustments. Alternatively you can create your own control strategy with DSE Lite software, often eliminating the need for an external PLC and its associated complexity and cost.

**Feedback Options**

The DC590+ has a range of options which are compatible with the most common feedback devices enabling simple motor control through to the most sophisticated multi-motor system. Armature voltage feedback is standard without the need for any interface option.

- Analog tach generator - AC or DC
- Encoder - 5, 12, 15, or 24V
- Optical fiber microtach encoder

**Interface Options**

Designed with connectivity in mind, the DC590+ has a number of communications and I/O options that allow the drive to take control of the application, or be integrated into a larger system. When combined with function programming, custom functions and control can be easily created offering the user a highly flexible and versatile platform for DC motor control.

**Programming/Operator Controls**

Featuring an intuitive menu structure, the ergonomically designed operator panel allows quick and easy access to all parameters and functions of the drive via a bright, easy to read backlit display and tactile keypad. Additionally, it provides local control of start/stop, speed demand and rotation direction to greatly assist with machine commissioning.

- Multi-Language alpha-numeric display
- Customized parameter values and legends
- On drive or remote mounting
- Local control of start/stop, speed and direction
- Quick set-up menu

**Connectivity**

Whatever the complexity of your control scheme, the DC590+ has the interface to suit. As standard there’s enough analog and digital I/O for the most complex applications. Alternatively, add the relevant ‘technology box’ for immediate access to serial communications and Fieldbus networks. The DC590+ has been designed to fit seamlessly, and without compromise, into any control environment.

**Analog/Digital Control**
- 5 Analog Inputs (12 bit + sign)
- 3 Analog Outputs
- 9 Digital Inputs (5 configurable)
- 3 Digital Outputs

**Serial Communications and Fieldbus Options**
- Profibus-DP
- Canopen
- Modbus RTU
- RS422/RS485
- Controlnet
- El Bisynch
- LINK
- Devicenet
- Modbus+
- Ethernet

All DC590+ units are available as non-regenerative or full 4-Quadrant regenerative models
**DRV - Packaged DC Drive Technology**

The DC590+ is available in either module, or alternatively ‘DRV’ format.

The DRV version is a self-contained packaged drive that includes all the peripheral power components associated with a DC drive system, integrally fitted within the footprint area of the drive.

**DRV version includes:**
- AC line or DC armature contactor
- AC line fuses
- DC fuse (regenerative version)
- Control/field fuses
- Provision for optional motor blower starter
- Provision for optional auxiliary control transformer

**Saving You:**
- Design time
- Panel space
- Component mounting and wiring
- Component sourcing
- Complexity
- Time and cost

---

**DC590+ Designed for Systems**

The DC590+ Integrator Series is the ultimate system drive, designed to meet the exacting demands of the most complex and sophisticated multi-drive applications across a diverse range of industries. All the following functions are available as standard without the need for any additional hardware.

- Function Block Programming
- Software Configurable I/O
- High Resolution (12 bit) Analog Inputs
- Winder Control
  - Open loop with inertia compensation
  - Closed loop speed or current
  - Load cell/dancer process PID
- Math Functions
- Logic Functions
- Controlled Field Supply
- ‘S’ Ramp and Digital Ramp

---

**DC590+ Designed For A World Market**

The DC590+ is available with full application and service support in over fifty countries worldwide. So wherever you are, you can be confident of full back up and support.

- Support in over 50 countries
- Multi-language menus
- Input voltage ranges from 220-690V (Special voltages available)
- CE marked
- UL and c-UL listed through 500 HP
- 50/60Hz

---

### Specification

**Ratings Power Configuration**
- DC590+ Four Quadrant Regenerative
- DC591+ Two Quadrant Non-Regenerative
- 1 Fully Controlled Three Phase Bridge

**Thyristor Controlled Variable Field Supply**

**Field Current (Amps DC)**
- 4A Frame 1
- 10A Frame 2 and 3
- 30A Frame 4
- 60A Frame 6 and H

**Field Voltage (VDC)**
- AC Input × 0.9 maximum

**Armature Current Ratings (Amps DC)**
- See table below for ratings.
- Overload 200% for 10 secs, 150% for 30 secs
- Higher ratings with reduced overloads available
- Please refer to manual

**Armature Voltage (VDC)**
- AC Input × 1.2 maximum

**AC Supply Voltage (VAC)**
- 110 - 220V (±10%) All Sizes
- 220 - 500V (±10%) All Sizes
- 500 - 600V (±10%) Frame 4, 6, and H
- 600 - 690V (±10%) Frame 6 and H

**Environment**

**Ambient Operating Temperature**
- 0°-45°C (32°-113°F) Frame 1 and 2
- 0°-40°C (32°-104°F) Frame 3, 4, 6, and H

Derate 1% per °C above ambient to 55°C (131°F) max

**50/60Hz Three Phase**

**Operating Altitude**
- Up to 1640 ft (500m) above sea level
- Derate 1% per 656 ft (200m) above 1640 ft (500m) to maximum of 14,000 ft (4500m)

**Protection**
- High Energy MOV’s
- Heatshink Overtemperature
- Instantaneous Overcurrent
- Thyristor Trigger Failure
- Inverse Time Overcurrent
- Interline Snubber Network

**Field Zero Speed Detection**
- Speed Feedback Failure
- Standstill Logic
- Motor Overtemperature

**Stall Protection**

**Inputs/Outputs**

**Analog Inputs (5 Total - 12 bit plus sign)**
- 1 - Speed Demand Setpoint (-10/0/+10V)
- 4 - Configurable

**Analog Outputs (3 Total - 11 bit plus sign)**
- 1 - Armature Current Output (-10/0/+10V or 0 - 10V)
- 2 - Configurable

**Digital Inputs (9 Total - 24VDC max)**
- 1 - Program Stop
- 1 - Coast Stop
- 1 - External Trip
- 1 - Start/Run
- 5 - Configurable

**Thermistor Input**
- 1 - Isolated

**Dimensions**
- For estimation only

**Standards**
- The DC590+ series meets the following standards when installed in accordance with the relevant product manual:
- CE Marked to EN50178 (Safety, Low Voltage Directive)
- CE Marked to EN61800-3 (EMC Directive)
- UL listed to safety standard UL508C through 500 HP
- cUL listed to Canadian standard C22.2 #14 through 500 HP

Valid at time of print

---

Black product code indicates DVF packages. Blue product code indicates chassis (controller only)

* First dimension is for non-regen, second is for regen

---

**Notes:**
- Frame 1-4 have integral cooling fan assemblies where required. Optional ducting kit for cubic roof external ventilation available for frame 4. Frame Size H has fan cooling assembly that can be cubic roof mounted or drive mounted. Add 5 1/2" (15mm) to overall height for drive mounted option.
- Note: Dimension table includes only the 230/460 volt ratings. Drives for a wide range of input voltages are available. For product codes, current ratings, and dimensional data on 110-230/460 575 volt, and 690 volt units, please consult factory. Drives of higher power ratings can also be provided upon request.
