With its outlook and structure designed by a famous French designer, this business solar portable power (solar charger) makes you feel the romance of France. As the product is positioned as high-end gift for business man, it is designed to be black, simple and with tough line so as to highlight the business personality. The body is made of aluminum magnesium alloy and disposed with sand blasting. So it touches delicate and comfortable.

The junction gap between components is uniform, which embodies high craftwork level. The black cover is embellished with black bine plant, which makes the whole product steady, vivid and romantic.

Different from the concept solar chargers with only little power in the market, this product uses two watt solar panel. So it can generate a current of more than 300mA with very good practicality. At the same time, the solar panel is encapsulated with ultra-thin steel glass. Compared with PT laminating solar panel, the ultra-thin steel glass solar panel has better light transmittance. Moreover, the ultra-thin steel glass solar panel would not turn yellow as the drip gum solar panel do after it is used for a long time.

This solar portable power can supply power for mobile phone, MP3, MP4, DC, PSP and other minitype digital products. Meanwhile, this product is the first solar charger in the market that can work with iPod and iPhone products. It is designed with automatic identifying function. When the solar portable power detect that the recharging device is iPod or iPhone product, it will automatically turn to the unique Apple charging mode and will not do any harm to Apple products.

Photo:

The unique ingenuity structure design makes it easy to detach the battery from the integrated body. This successfully solved the difficulty that other products in the market have to be discarded in advance when the battery is over. Thus, the solar portable power's life is prolonged a lot.

Photo:

Four indicator lights: red, yellow, green and blue create many light effects, flowery and vivid. They can not only indicate the volume of the storage battery, but also shows the charging situation.

Photo:

The accessories include the special transparent plastic slipcover and pothook, which enable you to hang the solar portable power to your clothes or bags when you are going outdoors for sports or something. Then you can recharge your digital products while doing sports. This solar portable power makes you truly enjoy the sunny life better.

This solar portable power is a must for business man. It is a high-end business gifts and shows the sender's good taste. Meanwhile, it is also a must for outdoor sports lovers.

Specification:

Model NO.: VSC-05

Solar panel power (Max): 2W

Solar panel operation Voltage (Max): 5.5V

Solar panel operation current: 360mA

Output Voltage: 5V

Output Current (Max): 1A

Battery Capacity: 1500mAh

Charging time: about 4 hours

Input Interface: DC IN

Output Interface: Mini USB

Material: Magnesium aluminum alloy

Dimension: 139*75*17mm

Weight: 222g

Color: Black
