

Product Specification

TOMAMINE® AO-455 Surfactant – Amine Oxides**Description**

TOMAMINE® AO-455 Surfactant is a unique, low foaming, high detergency amine oxide. No flammable solvents are present. This product is supplied as a 50% active amine oxide in a water diluent.

NOTE: This material is a low foaming surfactant, but not necessarily a defoamer. If a formulation has a foaming agent present, the final formulation will likely have high foaming characteristics, regardless of the presence or absence of this low foaming amine oxide.

Advantages

- Low foaming
- High detergency on both hard surfaces and fabrics
- Good grease cutting properties
- High actives
- Non-flammable

Applications

- All-purpose cleaners
- Bathroom cleaners
- Carpet & upholstery cleaners
- Dish-wash products
- Glass cleaners
- Industrial cleaners
- Low Foam cleaners
- Low VOC cleaners
- Transportation cleaners

Typical Properties¹

Active, %	50
Water %	50
Appearance @ 20 °C	colorless to yellow/amber
Viscosity (mPa.s @ 21.7 °C)	80
Melting point, °C	0
Boiling point, °C	99
Flash point, °C	> 100
Water solubility	miscible
Relative density	1.035
Surface tension @ 0.1 % (dynes/cm @ 22 °C)	34

Performance advantages

FIGURE 1: Ross-Miles Foam Height of TOMAMINE® AO-455

TOMAMINE® AO-455 Surfactant is an ultra-low foaming molecule, having negligible foam generation at any use level.

It is recommended for use in systems where extremely low foam is required.

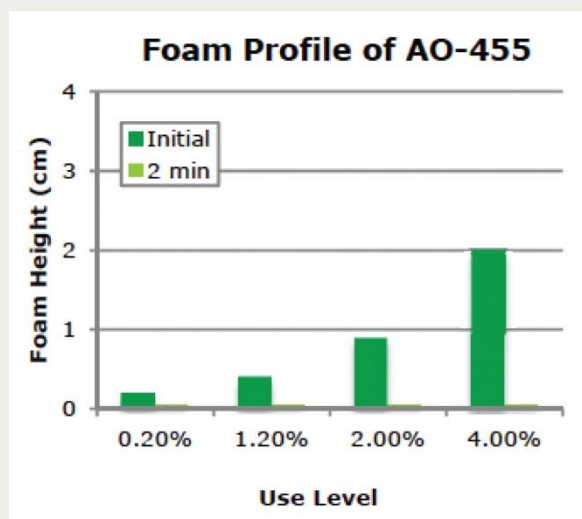

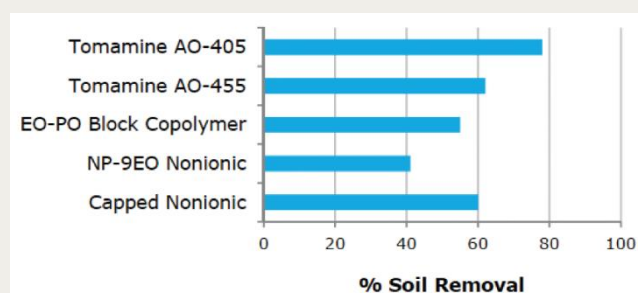

FIGURE 2: Gardner Hard Surface Scrub

ASTM method D-4488 oily soil cured at 100 °C for 16 hours 3 minute soak, 10 strokes
Simple Formulation: 0.5% Surfactant. 1.0 % NaOH

Hazardous goods classification

Information concerning

- classification and labelling according to regulations for transport and for dangerous substances
- protective measures for storage and handling
- measures in case of accidents and fire
- toxicity and ecological effects

is given in our material safety data sheets.

07/2017
