Colour:Multi-color option 6. Packing:Special packaging (colour box, bag, manual) 7. Material: ABS & 304Stainless Steel 8. Function:body slimming,tightening skin, anti-wrinkles,muscle stimulation 9. Model:Ultrasonic /Infrared/EMS Function 1.EMS low-cycle function: It simulates human hammering, massage, kneading, acupuncture and firming, and uses micro-current massage. In this mode, the current beam stimulates the muscle and makes it move passively. Muscle movement depletes the surrounding tissues of fat, sugar and carbohydrates. Muscles expend about 60-70 joules per second during normal exercise, but 3000-4000 joules per second can be lost at high frequencies. 2. Far infrared: The carbon fiber beam around the probe emits 12 micron band far infrared light, which can enter the skin depth, accelerate blood circulation so as to improve skin vitality, activate cells, strengthen metabolism. 3. Ultrasonic deep introduction: 1 million vibrations per second, into the deeper layer of subcutaneous fat, through high intensity vibration of the fat cell mechanical massage, chemical, heating and other comprehensive effects, gradually reduce the fat. Function:fat reduction,body slimming,tightening skin, anti-wrinkles,muscle stimulation 8. MOQ:2000 pcs 9. Certificates:CE,EMC/LVD Function 1. EMS low-cycle function: It simulates human hammering, massage, kneading, acupuncture and firming, and uses micro-current massage. In this mode, the current beam stimulates the muscle and makes it move passively. Muscle movement depletes the surrounding tissues of fat, sugar and carbohydrates. Muscles expend about 60-70 joules per second during normal exercise, but 3000-4000 joules per second can be lost at high frequencies. 2. Far infrared: The carbon fiber beam around the probe emits 12 micron band far infrared light, which can enter the skin depth, accelerate blood circulation so as to improve skin vitality, activate cells, strengthen metabolism. 3. Ultrasonic deep introduction: 1 million vibrations per second, into the deeper layer of subcutaneous fat, through high intensity vibration of the fat cell mechanical massage, chemical heating and other comprehensive effects, gradually reduce the fat.
