

Disposable Tourniquets

- *Features
- Disposable for single patient use
 - More safety, Efficacious and Comfortable
 - Medical TPE material and No Latex
 - Multicolor available

*Product Description

Latex free disposable medical tourniquet is used to intravenous infusion and adoption of blood specimen. It is widely used for fastening the vein in blood collection. It is applicable to venipuncture for other medical purposes. Convenient for first aid.

Latex free disposable medical tourniquet is a bandage, used to control venous and arterial circulation to an extremity for a period of time.

Latex free disposable medical tourniquet is usually applied when the patient is in a life- threatening state as a result of continuous bleeding.

Latex free disposable medical tourniquet has been introduced and designed especially for safe and hygienic blood collection, ensuring patient comfort.

Latex free disposable medical tourniquet is Comfortable & Safe to Patient/Doctor, The tourniquet has been designed as a single use stretch.

Latex free disposable medical tourniquet can be easily dispensed to encourage a single-use policy, helping reduce the potential for cross contamination between patients and healthcare workers.

*Product Application

Medical Materials&Accessories: Infusion,Stanch Bleeding,First Aid etc.
