# *Wire Part*

Add 6x core aramid fiber to extend lifetime

Change to use higher durability TPE jacket
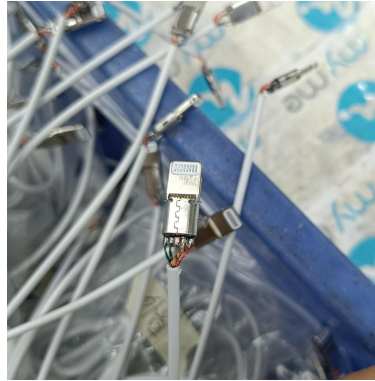

Earphone Quality Improvement

Plug Part

Laser SUS304 metal solder to protect DAC chipset

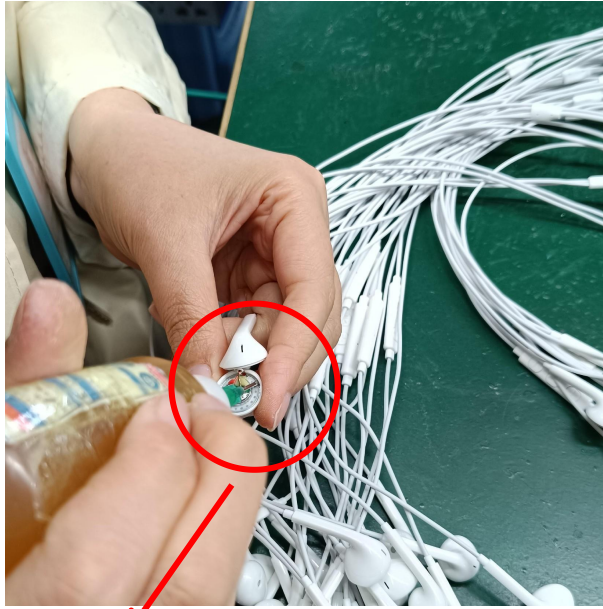

UV glue to fix the solder point

Injection to enforce the plug & pull & bend
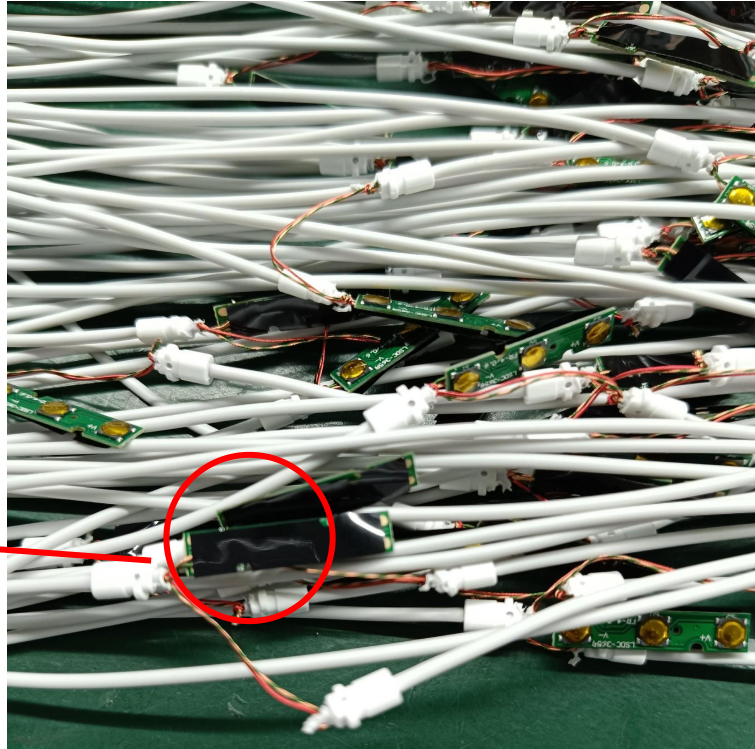

Driver Part

Precise glue on each driver

Tie a knot at the end of wire to enforce pull durability

Microphone Part

Add insulating sheet below the microphone PCB board, reducing the leakage of electricity

Earphone Quality Improvement

C100

Remote and Microphone Transmitter
Audio Decoded chip (TI-IC)

original

Goertek silicon mic

- ▶ MFi lightning connector-C100
- ▶ High-quality sound without loss, control siri intelligently
- ▶ Peripheral protection circuit
- ▶ Support Karaoke function
