

Meaning of RAFI code				Description of RoHS status	
<u>1st digit:</u> RoHS compliance of individual material		<u>2nd digit:</u> Increased temperature resistance for soldering			
<i>Blank</i>	Not yet tested	<i>Blank</i>	Not yet tested		
<b>0</b>	RoHS compliance is not possible	<b>0</b>	Temperature resistance to J-STD 020 C for reflow soldering is 245°C and for wave soldering 245°C/10s	●	Full RoHS compliance achieved, i.e. all materials are RoHS compliant and lead-free. Those components which have to undergo a soldering process are temperature resistant to J-STD 020 C for reflow soldering 245°C and for wave soldering 245°C/10s
<b>1</b>	At least one supplier is able to supply with RoHS compliance	<b>1</b>	Increased temperature resistance to J-STD 020 C for reflow soldering, or 260°C/10s max. for wave soldering is reached	<i>Date</i>	The anticipated date for achieving full RoHS compliance
<b>2</b>	All suppliers are able to supply with RoHS compliance	<b>A</b>	Must not be modified for RoHS compliance		
<b>3</b>	Material is ordered with RoHS compliance				
<b>4</b>	New material supplied is RoHS compliant; old material is still in stock. Mixing is possible.				
<b>9</b>	Material is RoHS compliant. Stock cleared.				
<b>A</b>	Must not be modified for RoHS compliance
