

## **SEFJ-600 Automatic Aluminum Foil Rewinding Machine**

**FOB SHANGHAI: 16,500USD/SET**

The machine is equipment that can once complete auto load paper tube, gluing, rewinding length counting and cutting in the production of aluminum foil material. It is suitable for processing work of packing materials such as household aluminum foil, etc. It is mainly used in the sectors of refreshing, grilling and cleaning, etc. It fits for small roll production.

1. The complete machine adopts Mitsubishi PLC/ Inverter/ Touch Screen control and safety & reliability.
2. In service, material receiving, gluing, winding and cutting, etc. are all automation control.
3. The quantization gluing is applicable for coating high viscosity glue.
4. Rewinding adopts constant speed control.
5. Squierrelcage operation adopts servo control, exact positioning without accumulated error.
6. Rolling small shaft delivery mechanism and exact safety.
7. Constant tension unwinding and winding stabilization.

### **Technical Data:**

1. Thickness of raw material: 0.01mm-0.03mm
2. Raw material width: 200-600mm
3. Maximum unwinding diameter:  $\Phi 600$ mm
4. Inner diameter of raw material roll core:  $\Phi 75$ mm
5. Inner diameter of finished product roll core:  $\Phi 24$ mm,  $\Phi 30$ mm,  $\Phi 38$ mm
6. Cutting length of roll: 3m-300m
7. Rewind Paper Core Thickness: bigger than 2mm
8. Magnetic powder brake: 25N.M
9. Magnetic powder clutch: 12N.M
10. Complete machine power: 4KW
11. Overall dimension: 4,160mm $\times$ 1,100mm $\times$ 1,300mm
12. Complete machine weight: About 1,500kg

**SILVER ENGINEER**  
Aluminum Foil Industry Supporter

## SEFJ-500 Semi-Auto Aluminum Foil Rewinding Machine

**FOB SHANGHAI: 8,900USD/SET**

Auto deviate adjust by motor, could adjust to right and left 2cm;  
Manual paper core loading, gluing;  
Auto cross-cutting, slitting(margin) and rewinding of foil rolls;  
Adopt the Japan PLC/Inverter/Touch Screen Control System;  
Complete with meter cutting length control;  
High productivity and user-friendly;  
Complete with all safety features ;

### Technical Data:

Aluminum foil thickness:	0.008mm to 0.03mm
Aluminum foil width:	100 - 500mm
Maximum unwind roll diameter:	500mm
Unwind Core Diameter:	76mm or 152mm
Rewind Core Diameter:	24mm, 30mm, 38mm, 50mm etc.
Rewind Paper Core Thickness:	bigger than 2mm
Cross-cutting length per roll:	2m to 500m
Production Speed:	2-8 rolls/minute
Magnetic Powder Braker:	5KG
Magnetic Powder Clutch:	5KG
Total Power:	4KW
Weight of machine:	650kg
Dimension of machine:	1350mm x 1100mm x 1000mm.

**This model of Rewinder fit for Heavy Duty Rolls production, as Automatic Rewinder use for heavy duty have no any advantage than this.**
