Contact blocks with
quick-connect
terminals

RAFIX 22 FS
The New Complete Control Component Range

Control component series

RAFIX 22 FS control components always consist of a combination of an actuator and a contact block or a signal indicator and a lamp socket / LED.

The large and rugged actuators are fastened in the front panel with a ring nut. Contact blocks with either quick-connect terminals or solder terminals for PCB mounting can be used.

Design

With the variable design concept, you can realise an individual and up-to-date design for your system! For example, you can use different frontrings to select your specific design or assign colours to different commands.

2

RAFIX
22 FS

Actuators and indicators

The RAFIX 22 FS series offers numerous actuators with a round or square collar shape:

- **Pushbuttons**
 - Optionally illuminated and opaque
 - With flush or raised lens
 - With flush or raised front ring
- **Selector switches**
 - Angle between positions 40° / 60° / 90°
 - Latching / momentary
 - Illuminated / non-illuminated
- **Keylock switches**
 - Angle between positions 40° / 90°
 - Latching / momentary
- **Signal indicators**
 - White / yellow / green / red / blue
- **Emergency stop pushbuttons to EN 418**
 - Unlatch by turning or pulling
 - Illuminated or non-illuminated

Essential features

- Various front ring types, metallized or plastic (in different colours)
- Large actuating area with very good tactile properties
- Designed for panel cut-out 22.3 mm with locating indent to IEC 60 947
- Min. grid spacing of 30 x 30 mm is possible
- Degree of protection IP65
- Suitable for legending

Contact blocks with quick-connect terminals

System

RAFI offers contact blocks with quick-connect terminals for the tried and tested RAFIX 22 FS actuator series. The contact block snaps into the actuator with a gentle >>> *click* <<< and is thereby fitted permanently.

Concept

For those applications where designing a PCB layout is too expensive or not possible at all, a new option has been made available by complementing the series. Catch noses provided on the new contact block snap precisely into the actuator. The screw neck of the actuator is provided with indents safeguarding a reliable union. The connection of the contact block is easily made by conventional quick-connect terminals on the rear end. A fin arranged at the centre of the contact blocks with quick-connect terminals helps to ensure good insulation. It serves as a guide for the LED-Clip at the same time. The new contact block with quick-connect terminals makes the RAFIX 22 FS series complete and perfect. Any external control components can be integrated into the system very easily and without needing any tools and you save space, effort and material.

Essential features

- Snap-in mounting into the actuator screw neck
- Depth behind panel 27 mm
- Socket for LED-Clip

Contact blocks for PCB mounting

System

The extremely low mounting depth enables you to use the control component as an integrated building block of your system solution.

Concept

You can include the RAFIX 22 FS contact blocks into your PCB layout and arrange them next to other components. The contact blocks float directly behind the actuator on the printed circuit board at a distance of only 9.2 mm behind the front panel, leaving lots and lots of space for other components. Illumination can be provided easily by simply inserting a 3 mm LED into the central hole. With the RAFIX 22 FS concept, you save *space, effort and material*.

Essential features

- Mounting on printed circuit board 9.2 mm behind the front panel (actuator floats over contact block)
- Can be combined with RAFI short-travel keyswitches RF, RACON, KN 19 and MICON 5
- Optionally illuminated by 3 mm LED

Actuators

2

Numerous design options for individual panels

RAFIX 22 FS is available with many options. The various front ring and lens types available offer you nearly unlimited design options for your panels.

RAFIX 22 FS is available with a round or a square collar. The square version can be arranged one collar to the next just as an integral keypad.

O-ring seal

Cast-on collar seal

Sealed against moisture and dirt

The O-ring seals the space between the lens and the actuator. The cast-on collar seal cannot be lost or distorted during assembly.

The special membrane seal reliably prevents moisture, oil or dust from penetrating the contact block.

In contrast with seals sliding up and down along the shaft, the special membrane seal is arranged in a fixed position on the housing. This ensures switching reliability for the full operating life (degree of protection IP 65 to DIN).

Special sealing

Single-handed assembly method

With the single-handed assembly method, the actuator is held in the mounting hole by the cast-on seal and can then be fixed by screwing on the ring nut from the rear.

The actuators and signal indicators are fastened to the front panel with a threaded ring in a 22.3 mm panel cut-out to IEC 60947. The cast-on collar seal made of thermoflex and an integrated special membrane provides a water-jet proof degree of protection IP 65 to DIN.

View on front side of front panel

Panel cut-out to IEC 60947

All actuators are provided with a locating pip. With a grid spacing of 30 mm, the collars of the square actuators are arranged next to each other without a space in between. We recommend to use this grid spacing also for the round collar shapes (IEC 60947).

Technical data

General information

Form of lens see order block
 Colour of lens see order block
 Frontringfarbe see order block
 Form of collar see order block

Einbaumaße

Length of collar see order block
 Width of collar see order block
 Overall height see order block
 Mounting hole 22.3 mm
 Key grid 30 x 30 mm
 Diameter of collar see order block

Mechanical design

Mounting ring nut
 Contact function see order block
 Illuminability yes

Mechanical characteristics

Operating travel 4 mm
 Robustness min. 100 N

Other specifications

Ambient temp. operating min. -25 °C
 Ambient temp. operating max. +70 °C
 Storage temperature min. -40 °C
 Storage temperature max. +80 °C
 Operating life 1 million momentary/
 0.5 million latching
 Degree of protection from front side IP65
 Resistance to constant environment IEC 600 68-2-3 und 2-30
 Resistance at variable environment IEC 600 68-2-14 und 2-33

RAFIX 22 FS selector switches

Pict.: Front ring, silver grey, illuminated

Pict.: Front ring, metallized, non-illuminated

Panel cut-out to IEC 60947-5-1

General data

The illuminated selector switches are provided with translucent handle markings. These are opaque on the non-illuminated versions.

Technical data

General information

Actuator	handle
Marking of handle	translucent/opaque white
Colour of front ring	see order block
Form of collar	see order block

Dimensions

Length of collar	see order block
Width of collar	see order block
Overall height	22.24 mm
Mounting hole	22.3 mm
Key grid	30 x 30 mm
Diameter of collar	see order block

Mechanical design

Mounting	ring nut
Contact function	see order block
Illuminability	yes
Rotating angle	see order block

Mechanical characteristics

Torque max.	1.5 Nm
-------------	--------

Other specifications

Operating life	0.5 million momentary/ 0.5 million latching
Degree of protection from front side	IP65
Ambient temp. operating min.	-25 °C
Ambient temp. operating max.	+70 °C
Storage temperature min.	-40 °C
Storage temperature max.	+80 °C
Resistance to constant environment	IEC 600 68-2-3 and 2-30
Resistance at variable environment	IEC 600 68-2-14 and 2-33

Magic Moments:

RAFIX 22 FS

The New Complete
Control Component Range

Depth behind panel: Magic 27 mm

On the front, a genuine control component – waterproof, rugged, large actuating areas with a choice of 14 different control and indicating elements in top design.

On the rear, the new contact block with quick-connect terminals – with a mounting depth of only 27 mm, silver contacts for mains voltage or gold contacts for electronics and illumination by LED-Clip.

Plug in, connect – done!

Contact us for more detailed information or put RAFIX 22 FS to the test in your project.

RAFIX 22 FS emergency stop pushbutton

2

General data

The emergency stop pushbuttons comply with IEC 60 204, IEC 60 073, IEC 60 947 and VDE 0113 Part 1. They are designed dupe-proof according to EN 418 with a positive mechanical movement sequence. A certain operating force must be exerted at the action point in order to prevent inadvertent operation. The pushbutton latches when pressed. The special shape of the actuator prevents the emergency stop pushbutton from being blocked. This means that the emergency stop process - once initiated - cannot be impeded by any jamming objects. Use only in combination with "emergency stop" contact blocks.

Contact blocks with quick-connect terminals

2

System

RAFI offers contact blocks with quick-connect terminals for the tried and tested RAFIX 22 FS actuators. The contact block snaps into the actuator with a gentle >>>click<<< and is thereby fitted permanently.

Concept

For those applications where designing a PCB layout is too expensive or not possible at all, a new option has been made available by complementing the series. Catch noses provided on the new contact block snap precisely into the actuator. The screw neck of the actuator is provided with indents safeguarding a reliable union.

The contacts of the contact block are easily connected by conventional quick-connect terminals on the rear end. A fin arranged at the centre of the contact block with quick-connect terminals helps to ensure good insulation. It serves as a guide for the additional LED-Clip at the same time if illumination is desired.

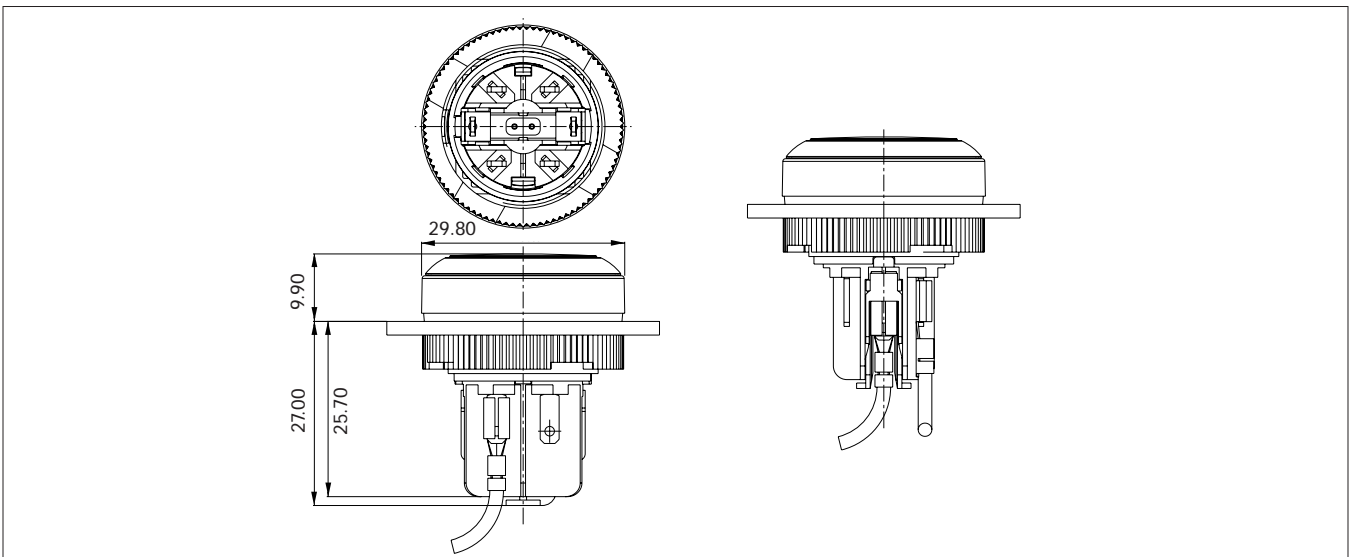

The new contact blocks with quick-connect terminals makes the RAFIX 22 FS series complete and perfect. Any external control components can be integrated into the system *very easily* and *without needing any tools* and you save space, effort and material.

RAFIX
22 FS

Design

Reliable assembly method

Essential features

- Depth behind panel only 27 mm including LED-Clip and cable lugs
- Quick-connect/solder terminals 2.8 x 0.8 mm
- The contact block engages permanently with the actuator only at the time of final assembly
- Compatible with all RAFIX 22 FS actuators: Pushbuttons, selector switches, keylock switches, emergency stop buttons and signal indicators, with all advantages this series offers:
 - Large actuating and indicating areas
 - Round or square collar shape
 - Panel cut-out to IEC 60947: 22.3 mm with locating indent
 - Degree of protection IP 65 (water-jet proof)
- Protection against contact for quick-connect terminals and cable lugs: Short-circuit proof even when the connection cables are under tensile strain
- Gold contacts for 100% reliable switching of low voltage (min. 5 V / 1 mA) or
- Silver contacts (max. 250 V/4 A) for mains voltage
- Contact arrangements: 1 NC, 1 NO, 2 NC, 2 NO, 1 NC + 1 NO
- Illumination with replaceable superbright LED-Clips in various LED colours, with quick-connect terminals 2.8 x 0.8 mm
- Actuators / contact blocks, signal indicators / lamp sockets and LED-Clips are stocked separately and only assembled at final assembly. This ensures utmost flexibility and most economic stockkeeping for this product range.

RAFIX 22 FS, Contact blocks with quick-connect terminals, gold contacts

Pict.: Universal, Au-contact, 2 NC

Pict.: Emergency stop, Au-contact, 1 NC + 1 NO

2

General data

The contact blocks are inserted into the actuators and latch there permanently. Emergency stop pushbuttons require special contact blocks which you can recognise by the plungers being in the interior. In addition, the emergency stop contact blocks and actuators feature two assembly guides which prevent rotation during assembly. We recommend to choose the LED colour in the same colour as the lens of the actuator in order to ensure satisfactory illumination.

2

General data

The contact blocks are inserted into the actuators and latch there permanently. Emergency stop pushbuttons require special contact blocks which you can recognise by the plungers being in the interior. In addition, the emergency stop contact blocks and actuators feature two assembly guides which prevent rotation during assembly. We recommend to choose the LED colour in the same colour as the lens of the actuator in order to ensure satisfactory illumination.

Technical data

General information		Switching reliability at 24V/5mA DC	10 x 10 ⁻⁶
Lamp	LED-Clip	Ambient temp. operating min.	-25 °C
Dimensions		Ambient temp. operating max.	+70 °C

2 NC	Emergency stop	black	red	1.20.126.704/0000

Caution: Emergency stop contact blocks can only be used with emergency stop pushbuttons. Universal contact blocks are not suitable for emergency stop pushbuttons.

PCB version

2

Combined with short-travel keys

The actuators of the RAFIX 22FS system are suited for integration into low-profile data entry systems. The small mounting depth and the PCB solder terminals make it possible to combine the contact blocks with RAFI short-travel keys MICON 5, RACON 8 an 12, RF 15 and RF 19 as well as KN 19 on one and the same printed circuit board.

Illumination

RAFIX 22 FS pushbuttons, selector switches and emergency stop buttons are also available as illuminated versions. For illumination, we recommend to use the superbright 3 mm LED in the colour matching the lens. The LED are fitted into the contact block and soldered together with it. The signal indicators are als illuminated with superbright LED soldered directly onto the printed circuit board. In order to ensure full illumination, the LED must be mounted on a base. Bases are available as accessories.

The contact blocks are soldered onto the printed circuit board. Illumination of the actuator is provided by a 3 mm LED inserted into the base of the contact block and soldered to the printed circuit board together with the contact block.

RAFIX 22 FS

The printed circuit board is fastened to the front panel with bolts, with the contact blocks sliding almost completely into the actuators. In this way an extremely low profile is achieved. Additional advantages: Individual wiring is made unnecessary and there is no more need for a cut-out in the printed circuit board in the control component areas.

9,2 mm

View on front side of front panel

Panel cut-out to IEC 60947

All actuators are provided with a locating pip. With a grid spacing of 30 mm, the collars of the square actuators are arranged next to each other without a space in between. We recommend to use this grid spacing also for the round collar shapes (IEC 60947).

Assembly indication

The mismatch of actuators and contact blocks must be in a range of \varnothing 0.2 mm.

Please note:

The placements of the contact blocks on the PCB are always conform to the placements of the actuators on the front panel. The drawings beside are showing upright locating pips of the actuators. If the actuators shall be rotated, the contact blocks have to be rotated similarly.

RAFIX 22 FS contact blocks with gold contacts

Pict.: Universal contact block, 1 NC + 1 NO, gold contacts Pict.: Emergency stop contact block, gold contacts, 2 NC

2

General data

Illumination information:

The contact blocks are suitable for use with illuminated actuators: Insert the desired LED into the integrated LED base and subsequently solder it together with the contact block.

We strongly recommend using superbright LED since this ensures homogeneous illumination.
