

# RHGEL 9800B

---

## Solvent based anti-sagging/anti-settling agent

**RHGEL 9800 B** is a special polyamide wax, designed for various of solvent based paints and coatings, provide excellent thickening, pigment anti-settling and anti-sagging function, also enhance flake orientation of metallic and pearlescent pigments in formulation.

### APPLICATION:

- \* Acrylic resin paints
- \* Chlorinated rubber paints
- \* Vinyl resin paints
- \* Acrylic/melamines
- \* Unsaturated polyester paints
- \* Epoxy resin paints
- \* Asphalt & Tar Coatings
- \* Adhesive& Sealant

### TYPICAL PROPERTIES:

composition:	polyamide wax
appearance:	white to slight yellow paste
non-volatile content:	20% by wt.
solvent:	xylene /ethanol/methanol
melting point:	125° C
flash point:	16° C

### ADVANTAGES:

- \* Impart strong thixotropic properties, excellent anti-settling and anti-sagging
- \* No need precise temperature control than traditional additive
- \* Less seeding tendency and easy to process
- \* Minimum affect on film gloss and weather resistance
- \* Easy dispersing and excellent compatible with a wide rage of solvent/resin
- \* Improve orientation of metallic and pearlescent pigments

### USE DOSAGE:

For anti-sagging: 0.5 ~ 4.5% (by wt)  
For anti-settling: 0.3 ~ 1.5% (by wt)

### PACKAGE:

15Kg pail and 200Kg drum
